(54) Mobile free-range feeding station

(57) A feeding station adapted for use by pigs or other animals comprises a feed-containing shed 11 sandwiched between two kennels 12 and 13; the shed, and each kennel incorporating openings 17 for entry and exit of the animals, which openings span the respective interfaces between the shed and each of the kennels and the station being mounted on skids or other means facilitating its movement from one location to another in the field when in use.
